

The Wet Abrasive Blaster (WAB) quickly and easily removes even the toughest dirt and carbon stains

TOUGH ON OIL, CARBON SOOT & GREASE

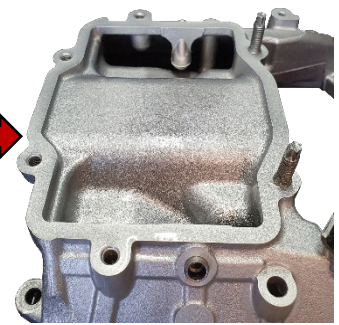

GENTLE ON PARTS !

Before

After

Toyota Landcruiser V8 Manifold

Advantages of the Hotwash Wet Abrasive Blaster:

- ✓ **Makes easy work out of tough jobs**
- ✓ **Saves you time (No need to degrease first)**
- ✓ **Dust free operation**
- ✓ **Produces a finer result**
- ✓ **Tough on dirt – Gentle on parts**
- ✓ **Reduces labour costs**
- ✓ **Increases productivity**

- **Stainless steel construction** (*No rusting – No corroding*)
- No need to **degrease** parts first
- The finish is produced via the flow of water combined with a mild abrasive, delivering a **finer result** due to the flushing action of the water.
- No media is permeated into the component. Unlike dry blasting, **no dust** is created by the break-up of the abrasive material. This means the WAB method is totally dust-free and ideal for the workshop environment.
