

FEATURES	BENEFITS
Loading basket with finer grid	Prevents tall items from toppling over and smaller items from falling through.
Pneumatic sliding door	For safer, faster operation. Access for a loading trolley
Filters on spraybars	For regularly flushing dirt, and preventing blockages in the spray nozzles
120 x spray nozzles	Delivering a high volume of water to ensure optimum cleaning of every surface.
Auto top-up	Keeps the water tank topped up to prevent burning out the heating elements
Water level sensor	Protects the heating elements from burning out.
Pump hour meter	Ensures regular cleaning intervals are easy to follow.
Adjustable feet for uneven floors	For adjusting the alignment of the machine on an uneven surface
3.0kw Ebara stainless-steel pump	For longer pump lifespan and superior cleaning power
Adjustable cleaning timer	User-definable timer to ensure 100% cleaning of all parts
Emergency cut-off button	Ensures safety for the operator
AISI304 Stainless-Steel construction	Gives the machine a longer lifespan (Can be produced with Food Grade stainless)
Practical loading capabilities	Offers sufficient height for the taller objects that need cleaning

Pneumatically operated (Hands Free) sliding door for safer, faster operation.

Filters and valve on all spray bars for regularly flushing dirt, and preventing blockages

Finer grid configuration on the basket to prevent taller items from toppling over and small items falling through

Auto top-up valve and solenoid. Keeps the water tank topped up to prevent burning out the heating elements

Robust castor wheels for easily moving the trolley from point to point

Loading trolley for carrying heavy parts from the job to the machine with ease.

120 stainless-steel spray nozzles, delivering a high volume of water to ensure optimum cleaning of every surface.

Adjustable, user-definable timer to ensure 100% cleaning of all parts

Pump hour meter, ensuring regular cleaning intervals are easy to follow.

Emergency cutoff switch to ensure safety for the operator

Powerful 3.0Kw Ebara, stainless steel pump for longer life and superior cleaning power

Discharge valve for fast, simple draining of the

Level sensor to detect low-level of water. Protects the heating elements from burning out
